Instead respect for a professional's autonomous personal and/or professional opinion is to be acknowledged. One can always move on to a second opinion if u didn't like what u needed to hear the first time. Hence, the need for this national opinion petition. When appropriate urgency of action has not been forthcoming from admins/management, in a reasonable expected time of following through on reasonable routes of reporting, then yes its time to go public per our constitutional right to freedom of speech. Johann Lamprecht	Johannesburg	"I'm signing because...the reasons are too numerous and will be echoed eloquently by my colleagues. I will simply summarize by saying that the communist worldview has destroyed countless lives throughout history. Despite one of the most progressive constitutions in the world, it lies dormant in its purpose to help liberate the people of South Africa due to oppressive, greedy power mongers within the State who will stop at nothing to hold on to their positions of power and privilege, even if it means suppressing the truth and denying the suffering of millions of people - the very people who gave them their trust by voting them into power and the very people who have sworn to protect the health of the aforementioned.
